Reissue Application Declaration by the Inventor**

At least one error upon which reissue is based is described as follows:

During the prosecution of the application that issued as the above patent, the inventors did not recognize that the features disclosed in the patent in Figs. 1 and 13A and at column 12, lines 30-36, were appropriate to claim. As such, the inventor's did not claim all that they had a right to claim. This error was made without deceptive intent. Specifically, the inventors did not claim any one or more of the features of an optical disk including a data zone having pits indicating data signals readable by light radiation; a reflective layer formed on the data zone; and portions of the reflective layer being trimmed by a laser forming markings, wherein the markings form a barcode pattern indicating information and are formed on the pits functioning as a track on the optical disk.

I hereby claim foreign priority benefits under 35 U.S.C. §119(a)-(d) or § 365(b) of any foreign application(s) for patent or inventor's certificate, or § 365(a) of any PCT international application which designated at least one country other than the United States, listed below and have also identified below, any foreign application for patent or inventor's certificate, or PCT International application having a filing date before that of the application on which the priority date is claimed:
